January 3, 2001

Dear Representative Pringle:

Thank you again for your concern about the Alabama Underwater Cultural Resources Act. Some of the divers here in Birmingham, along with myself, have worked up new wording for a more friendly version of this act. I would like you to sponsor this act in the next legislative session if you can. The wording done by the Historical Commission on the bill passed two years ago is very bad. It is neither good for any person or history. Instead, it stifles history by discouraging people from sharing their findings. I think you will find our proposed wording to prohibit damage to any particular sites that need such prohibition. I hope you can help us with this.

Sincerely,

Steve Phillips
